- Teamwork & Collaboration
- Communication Skills
- Problem-Solving Mindset
- Attention to Detail
- Adaptability & Willingness to Learn
- Time Management
- Creativity
- Responsibility & Work Ethic
- Customer-Focused Thinking
- Critical Thinking

STOJANCHE NAJDESKI

Junior Front - End Developer

"Bringing ideas to life, one line of code at a time."

ABOUT ME

Enthusiastic junior front-end developer with hands-on experience in building responsive websites and web applications. Proficient in HTML, CSS, JavaScript, and React, with a keen interest in creating interactive user experiences. Eager to contribute to a dynamic development team and continue growing in the field.

EXPERIENCE

Operator | Jan 2025 – Present

Evrotip – Sports Betting

- Operated digital betting systems and assisted customers with interactive interfaces. Maintained accuracy in handling user data and financial transactions. Developed strong attention to detail and ability to work under pressure. Communicated technical and non-technical information clearly to customers. Gained experience with structured workflows and customer-facing digital platforms.

Photographer & Videographer | 2022 – Jan-2025

Foto Zoran – Kichevo

- I worked as a wedding photographer and videographer. In addition, I worked in a studio where I interacted with clients on a daily basis, managing product sales and customer relations. My responsibilities also included using Photoshop to restore old photos and designing custom birthday invitations for children.

Waiter & Bartender | 2018 – 2022

Castello Cafe | 2021 – 2022

Harley Cafe | 2020 – 2021

New Age Lounge Bar | 2018 – 2020

- During my 4 years as a waiter and bartender, I gained extensive experience in customer service, handling orders, preparing drinks, and managing busy environments. I developed strong interpersonal skills by interacting with a diverse range of customers, ensuring a positive and welcoming atmosphere. My ability to multitask and work efficiently under pressure allowed me to provide timely and excellent service.

PROJECTS

Login Register Application

- <https://github.com/StojanceNajdeski/StojanceNajdeskiProjects/tree/LoginRegister>

A simple authentication app built with React, featuring login and registration forms. Uses form validation, conditional rendering, and localStorage to manage user sessions. Styled with responsive design principles for usability across devices.

Login Register Application tRPC

- <https://github.com/StojanceNajdeski/StojanceNajdeskiProjects/tree/LoginRegisterTRPC>

Authentication system built using the T3 Stack (Next.js, TypeScript, tRPC, Zod, Drizzle ORM). Focused on backend logic for user registration, login, session handling, and protected routes. Features type-safe API communication with tRPC and database interactions via Drizzle ORM. Built as a foundation for scalable full-stack applications.

Rick And Morty Application

- <https://github.com/StojanceNajdeski/StojanceNajdeskiProjects/tree/RickAndMortyApp>

Authentication system built using the T3 Stack (Next.js, TypeScript, tRPC, Zod, Drizzle ORM). Focused on backend logic for user registration, login, session handling, and protected routes. Features type-safe API communication with tRPC and database interactions via Drizzle ORM. Built as a foundation for scalable full-stack applications.

To-Do-List Application

- <https://github.com/StojanceNajdeski/StojanceNajdeskiProjects/tree/To-Do-List-Project>

Authentication system built using the T3 Stack (Next.js, TypeScript, tRPC, Zod, Drizzle ORM). Focused on backend logic for user registration, login, session handling, and protected routes. Features type-safe API communication with tRPC and database interactions via Drizzle ORM. Built as a foundation for scalable full-stack applications.

Brainster Project 1

- https://git.brainster.co/Stojanche.NajdeskiFE16/brainsterprojects_stojancenajdeski_fe16/-/tree/Project-01

A responsive product listing page built with HTML, CSS, and JavaScript. Features dynamic product filtering by category and search functionality. Designed to simulate a real-world online store layout with clean UI and interactive elements.

Brainster Project 2

- https://git.brainster.co/Stojanche.NajdeskiFE16/brainsterprojects_stojancenajdeski_fe16/-/tree/Project-02

A blog page built with HTML, CSS, and JavaScript, displaying a list of posts fetched from a local JSON file. Includes post filtering by category, search functionality, and a responsive layout optimized for various screen sizes.

Brainster Project 3

- https://git.brainster.co/Stojanche.NajdeskiFE16/brainsterprojects_stojancenajdeski_fe16/-/tree/Project-03-MHRA

A blog page built with HTML, CSS, and JavaScript, displaying a list of posts fetched from a local JSON file. Includes post filtering by category, search functionality, and a responsive layout optimized for various screen sizes.
